Players	1–4 local split-screen · up to 6 online/LAN (planned)
Price	TBA
Website	paxgamestudio.com

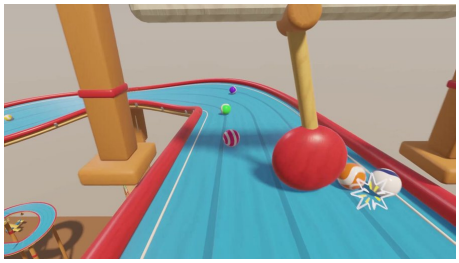

About the Game

Rollout Rally turns a marble race into a rivalry. Steer, boost, shove and shield through 10 colorful worlds in a physics racer built around close finishes — against CPU rivals, side by side on one screen, or in teams.

Race solo in Grand Prix cups, team up in the 3v3 Team Cup or the co-op Team Rally, or sit back and let pure physics decide in One More Rollout. Rollout Rally is coming to Steam Early Access in Q1 2027; online play for up to 6 players is in development.

In the game

- **10 Worlds, 20 Tracks** — From Confetti Coast to Reactor Rush, every world has a ~1-minute Scenic Run and a ~4-minute Grand Gauntlet.
- **Four Ways to Race** — Grand Prix, 3v3 Team Cup, co-op Team Rally where relay markers unlock a speed bridge, and One More Rollout, a pure-physics spectator mode.
- **Skill-Based Driving** — Steer and brake, Pulse rivals aside, Shield against hits, earn boost by driving clean and ride the slipstream.
- **Marble Studio** — Pick your colour, pattern and name from 12 colours and 6 patterns.
- **Cups Your Way** — 1, 3 or 5-race cups with reverse, standings-based or random starting grids.
- **Couch Multiplayer** — Up to 4 players on one PC with split-screen and per-player standings; CPU rivals fill the grid of 6.
- **Broadcast Presentation** — Track flyover, start lights, live positions and time gaps, with follow, close-up and cinematic cameras.
- **Full Settings** — Key rebinding with presets, separate audio levels, display and graphics options.

Planned

- **Online & LAN for up to 6 Players** — Invite friends on Steam and join in one click, with no port forwarding.
- **Remote Play Together** — Play the couch mode online with friends; only the host needs the game.
- **Steam Cloud & Unlockable Cosmetics** — Your profile, stats and settings follow you; unlock new colours and patterns as you play. Tracks and modes are never locked.
- **Achievements, Leaderboards & Time Trials** — Steam achievements and stats, plus per-track best times with global and friends rankings.
- **Voice & Text Chat** — Steam voice chat in the lobby and in races, lobby text chat and one-button quick messages.
- **Full Controller & Steam Deck Support** — Every screen playable with a controller, with button prompts that match your device; targeting Steam Deck Verified.
- **A Soundtrack for Every World** — Each world gets its own music, shuffled during races.
- **Twitch Chat Integration** — Viewers join a race by typing their name in chat, and the streamer can reward the winner.
